

EUROGEO is the European Association of Geographers, a membership-based professional society supporting geographers in their jobs and careers. EUROGEO has special consultative status with the United Nations Economic and Social Council, is member of Habitat professionals Forum and is also member of the Professionals Constituent Group at the General Assembly of Partners for Habitat III. EUROGEO is strongly committed to the training of geospatial technologies for geography practice and professional development of geographers and thus, encourages actively the use of geospatial technologies, remote sensing and geographical information systems for the implementation of the New Urban Agenda. This statement underlines the importance of monitoring issues for the New Urban Agenda through a set of indicators- statistical but also cartographical-. Population growth, sprawl, water and sanitation infrastructures, employments, transportation, housing, climate change impacts, public spaces, informal settlements, etc. are, inter alia, some basic topics for data collection and mapping, as expressed in paragraph 159 of the New urban Agenda, in order to achieve a sustainable urban development. Geography as the interdisciplinary science of settlements, and geographers as professionals of earth landscapes, are engaged to the spatial analysis of the urban shifts but also to provide solutions, according to UN-Sustainable Development Goals, to improve urban environment and to foster more sustainable cities.

Rafael de Miguel González
VicePresident of EUROGEO
