

Farmers PCG Statement – Nairobi, Kenya

A successful NUA in Quito marks the beginning of an implementation that strengthens the Farmers constituency in delivering effectively in a diverse food system which is demanded by cities

The constituency encourages stronger communication with Rome Based Agencies; which would be a clear indicator of an inclusion of the voice of cities and territorial government in discussion and follow up of SDG 2 which is led by FAO.

Our constituency aspires with enthusiasm, an opportunity for participation, to close the implementation gaps that will balance development and growth at the local and national level; using an integrated approach to embrace urban-rural issues. Local authorities and agricultural agencies should be at the centre of discussion to escalate human capital injection
